

Our Profile

GE TEK Electronics Pvt Ltd is a manufacturers and suppliers of High current/Voltage rectifiers and Industrial Electrostatic Precipitators. And further it is involved in supplying required spares parts for the above products.

Initially Proprietorship Company has been started in the name of GE TEK ELECTRONICS during the year 2012 with 18 years of experience in power electronics field.

GETEK ELECTRONICS PRIVATE LTD started during the year 2013. With our vast experience and high technical standards in the power electronics field, we gained reputed customers with in short span of time.

We have a strong experienced team to handle all kind of High Current Rectifiers. Our team is extending international services for all international make Rectifiers for Troubleshooting and servicing of old Rectifiers / Retrofitting of rectifiers / Overhauling of high current rectifier units.

GE TEK Electronics Private Limited is offering single point service support for both Electrical and Mechanical service and spares support for Electrostatic Precipitators. GE TEK Electronics Private Limited make advanced digital controller GE-02V2 for controlling High Voltage DC power supply for Electrostatic precipitator application is giving improved ESP performance.

We also offer service support, electro mechanical spares for Electrostatic precipitator like support insulators, hopper heaters and level sensors etc.

GE TEK Electronics Pvt Ltd

We care for Power and
Environment

GE TEK Electronics Pvt Ltd

Air Pollution Control Equipment's

We care for Power and Environment

Electrostatic Precipitators

Bag Filters

Engineering and Supply

We do engineering of Pollution control equipment's and supply the respective material with minimum period.

Field Service

Expert field service of pollution control equipment's is being provided with best commercial terms. Satisfied customers service is provided till the date.

Spares and Retrofit Jobs

1. We do supply each and every spares for all type of air pollution control equipment's
2. And of course we are doing retrofit jobs of ESP Mechanical and electrical, Bag filter Mechanical and electrical jobs.

Products we handle with A.P.C Systems

Electrostatic Precipitators

High Voltage Rectifier and Control panels

Bag Filters and Dust extraction systems

GE TEK make Precipitator field controller (GE02V2)

GE TEK Make High Voltage rectifier controllers

GE TEK Make High voltage rectifier controllers (GE02V2) made advanced technology with customizable IO's has user friendly operation.

We are doing retrofit jobs with outdated control panels of ESP and up gradation of non reliable controllers. Simply with minimum time period doing retrofit work with all type of rectifier control panels.

Spares we Deals With :

Spares of ESP:

Collecting Electrodes

Emitting Electrodes

Rapper Bars

CE Hammers

DE Hammers

Anvils

Cam Assembly system

Rapping shafts

GD screens

Insulator Heaters

Hopper heaters

Level probes

Geared Motors for rappers

TR set controllers

Support Insulators

Shaft insulators

Thermostat

Slide Gates

Mechanical Safety Interlock

Electromagnetic Vibrators

RTD

Spares of Bag Filters

Bags

Cages

SOV's

Cage Ventures
